CONTINUING PROFESSIONAL DEVELOPMENT PROGRAMME ON

Construction Management – Best Practices and Modern Technologies

13 – 17 March, 2017

(An ISO 9001:2008 Certified, AICTE & CEA Recognized Institution)

Centre for Promotion of Professional Excellence

INTRODUCTION:

Management of the construction works in a project has become a vital point as it involves many components. This has to be tackled in an efficient manner for economic, timely and quality completion of any project. As the Construction Management is complex in nature, planning is to be done in advance duly taking into consideration, the various works involved, technical and non-technical skills required, finances required, period of completion to see that every component is completed in time as per the requirements.

As most of the projects are getting in trouble due to lack of proper planning and finances. It is desirable to have an effective management in construction of any project so as to get the benefits expected in time. Unless the officers involved in construction of projects and construction companies are properly trained in construction management, it is very difficult to manage the construction of any project. Realizing the necessity, ESCI is organizing a **5-day** training programme on **Construction Management – Best Practices and Modern Technologies** from **13 – 17 March, 2017**.

OBJECTIVES:

To explain broadly Construction Management and various aspects of the Construction Management and effective Construction Management.
