(An ISO 9001:2008 Certified, AICTE & CEA Recognized Institution)

Centre for Promotion of Professional Excellence

## INTRODUCTION

Empowerment of public at large due to current exponential technology advancement in the Information Technology field has simultaneously thrown challenges to the organizations to safeguard its vital information to protect its business interests and also avoid exploitation by the vested interests. Most organizations have a number of information security controls in operation which specifically address certain aspects of IT or data structure leaving non-IT information assets (such as paperwork and proprietary knowledge) less protected on the whole. Therefore without a systematic management of information, the controls tend to be disorganized and disjointed.

**ISO/IEC 27001:2013 – Information technology – Security techniques – Information security management systems – Requirements**, formally specifies a management system that is intended to bring information security under explicit management control. Being a formal specification means that it mandates specific requirements. Organizations that claim to have adopted ISO/IEC 27001 can therefore be formally audited and certified compliant with the standard.

## LEARNING OBJECTIVE

- Systematically examine the organization's information security risks, taking account of the threats, vulnerabilities, and impacts;
- Design and implement a coherent and comprehensive suite of information security controls and/or other forms of risk treatment (such as risk avoidance or risk transfer) to address those risks that are deemed unacceptable;
- Adopt an overarching management process to ensure that the information security controls continue to meet the organization's information security needs on an on going basis.

## KEY BENEFITS

- It can act as the extension of the current quality system to include security
- It provides an opportunity to identify and manage risks to key information and systems assets
- Allows an independent review and assurance on information security practices
- It is suitable for protecting critical and sensitive information
- It provides a holistic, risk-based approach to secure information and compliance
- Demonstrates credibility, trust, satisfaction and confidence with stakeholders, partners, citizens and customers
- Demonstrates security status according to internationally accepted criteria
- Creates a market differentiation due to prestige, image and external goodwill
- A company is accepted globally if it is certified to ISMS.

## COVERAGE

- Concepts of Information Security
- The importance of Information Security
- ISO 27001:2013 Standard Requirements
- Reviewing Security threats and vulnerabilities
- Management of Security Risks
- Selecting Security Controls

## COURSE PROVIDER

This course is conducted in association with **MacLead Certifications (Formerly Achievement Labs' Management Systems Institute)**. This ISMS Lead Auditor course is accredited by NABET (National Accreditation Board for Education & Training), a constituent of Quality Council of India (QCI), and is recognized by RABQSA.

## RECOGNITION & CERTIFICATE

The course is recognized by NABET as meeting the requirement for RABQSA /NABET certification to ISMS Lead Auditor. . Participants who successfully complete the Continuous Assessment during the course and the Written Examination which is conducted on the last day of the course will be issued certificate by MacLead Certifications, which will facilitate registration as ISMS auditor under RABQSA scheme, if desired.

## METHODOLOGY

The programme will be conducted in an interactive environment providing greater scope for discussions. Emphasis will be on a highly participative style of learning.

## TARGET PARTICIPANTS

ISO 27001 ISMS program is suitable for MIS / IT divisions of all types of organizations in industry, power, service, defence, banking and other private and governments sectors.

ISO/IEC 27001 is also highly effective for organizations which manage information on behalf of others, such as IT outsourcing companies: it can be used to assure customers that their information is being protected.
