Continuing Professional Development Programme on Hands-on-Training on GIS Application-Arc GIS (Urban)

08-10 November 2023

Interactive Sessions | Digital Learning | Assessments | 24/7 Experts Online/Offline Support

Introduction

Housing availability, sustainability goals, and economic changes are compelling cities to better plan for the future. ArcGIS a popular geographic information system (GIS) contains visualization and editing enhancements that enables planners and design professionals to manage the cities development plans, analyzing factors contributing to decisions, and sharing information with the stakeholders.

Arc GIS provides a geospatial infrastructure that allows organizations to leverage geographic information system (GIS) technology at scale—with rich content and advanced tools for mapping and analytics that help professionals, solve problems holistically and improves planning and decision-making to urban planning. Via web-based 3D application it supports digital transformation of city, regional and scenario planning and impact assessment and encourages collaboration with community stakeholders and help all groups work toward a more sustainable future. By considering the above factors and importance of Arc GIS in today's world ESCI has introduced three days hands on Training Programme on Arc GIS to increase participants software proficiency with practical, in-class exercises.
