A Smart Learning Platform

Introduction

SAP S4 HANA is called as SAP Business Suite. This is the next generation, innovative business suite from SAP. The S4 HANA operates on SAP HANA, the most advanced of in memory database platforms. It is based on the most advanced design principles, providing the SAP Fiori user experience. There are three options that are available-the hybrid, cloud and the on –premises. It is possible to source S4 HANA, from the cloud and Fiori is basically one of the graphical user interfaces.

S4 HANA is a simple way of driving businesses, with real-time connection between devices, people and business networks and brings forward various new models in the business. S4 HANA remains the best choice for digital transformation. The technology allows the easy remodeling of things.
