INTRODUCTION

Acceptance of validated test results is an important requirement in national / international business scenario. This can happen only when proper validation of the test results is done. This process of validation establishes confidence in customers regarding the products; more so when the testing and calibrating laboratories have been accredited by the recognized bodies.

As part of accreditation, a Laboratory's Quality Management System is thoroughly evaluated on a regular basis to ensure continued technical competence and compliance with the standard. To achieve this objective, laboratory accreditation based on ISO/IEC 17025: 2005 - *General Requirements for the Competence of Testing and Calibration Laboratories,* is an accepted norm world over.

In India, NABL (National Accreditation Board for Testing and Calibration Laboratories) controls the laboratory accreditation based on ISO / IEC 17025:2017.

OBJECTIVES

- Understand the need for validation of test results.
- Enable to interpret ISO/IEC 17025:2005 requirements.
- Improve confidence in test results.
- Increases confidence in personnel performing this testing / calibration accordance with International Standards
- To qualify participant to work as Laboratory Quality Manager.
- To enable participants to develop system documentation as per standard and implement the same effectively.

COVERAGE

- Introduction to NABL Accreditation
- Need for Validation of Test Results
- ISO / IEC 17025: 2017 (Updated Version) Standard Requirements
- NABL Specific Criteria for Laboratories Accreditation
- Documentation Requirements (Structuring & Developing Laboratory Documents, Quality Manuals, Procedure & SOP and Forms & Formats etc.)
