### Continuing Professional Development Programme on O&M of Water Supply & Sewerage Network System and Treatment Plants

07 - 11 July 2025

Interactive Sessions | Digital Learning | Assessments | 24/7 Experts Online/Offline Support

#### Introduction

Safe water supply and hygienic sanitation facilities are the two basic essential amenities the community needs on a top priority for healthy living. As about 80% of water used by the community comes out of houses in the form of waste water which, unless properly collected, conveyed, treated and safely disposed of, may eventually pollute our precious water resources and cause environmental degradation. Hygienic sanitation facilities through low cost on – site sanitation, conventional sewerage and sewage treatment are very important. As of now, as per Central Public Health & Environmental Engineering Organization (CPHEEO) manual on sewerage and sewage system, about 45% of urban population has been provided with reasonable hygienic sanitation facilities in our country.

This comprehensive training programme on the Operation & Maintenance (O&M) of Water Supply & Sewerage Network Systems and Treatment Plants has been meticulously designed to equip engineers, technicians, and other stakeholders with the knowledge and practical skills required to manage these critical assets effectively. Recognizing the specific challenges and demands of Hyderabad's water and sanitation infrastructure, this programme delves into the fundamental principles, best practices, and latest technological advancements in O&M.

#### Objectives

The five -days Course aims to enhance the subject knowledge, skills and attitude of the engineers working in Design, Operation and Maintenance of Water Supply & Underground Sewerage Systems. It covers advancements and emerging technologies

#### Course Coverage

- Basic principles of Water Supply & Sewerage Systems
- Fundamentals of biological wastewater treatment, influent and effluent standards
- O&M of Water Supply Network and WTPs
- O&M of Underground Sewerage Network System and Wastewater Treatment Plants (WWTPs)
- Energy Efficiency and Sustainability in O&M
- Trouble shooting in the O&M
- Asset Management and Digitalization in O&M
- PPP Models
- Field visit might include WTP, Smart Water Metering Project Site, SCADA Control Center and STPs etc. based on availability
- Each session is covered with Practice Sessions, case studies and group discussion

#### Methodology

Methodology of the programme includes classroom Sessions with Lectures/discussions, with audio visual aid; bench - marked video shows, Chalk & Talk sessions, group discussions, case studies, debates, sharing of experiences, etc. All the sessions will be interactive, demanding active participation from all the participants.
